About Us

Find us on:  Facebook

Supporting you with a comprehensive range of professional UV fly control units.

Innovation, quality and power are key components in all our units. Combining excellent value with expertise from technicians and leading biologists, we offer a diverse range of professional and specialist Electric Fly Killers.

We are passionate about flying insect control, guaranteeing that you receive the very best units built to the highest specification.

Quality Products

Our high-quality insect control products are the preferred choice for many of the world's best 5-star resorts and hotels, franchised food outlets, hospitals, commercial and domestic kitchens, government and public parks and international airports.

- We strive to continue our research and development, manufacturing new and improved products and delivering tangible benefits to public health, the environment and the community through the control of pests, diseases and infection.
- Providing the most cost-effective and eco friendly pest control solutions on the market.
- All products come with a 3-year limited warranty
- We conform to all Australian and International safety standards.

Quality Management

We pride ourselves on our quality service and efficient management.

- We have a dedicated management, sales and production team servicing many valued distributors and customers throughout the world.
- Our management ethos is simple: uncompromising first-class service, quality products, quality design; always available, 7 days a week.

Quality Service

Please don't hesitate to contact us for more information on our people, products or organization.

- We pride ourselves on fast, reliable and efficient delivery of our products through most countries worldwide.
- We have a comprehensive, easy-to-use website providing detailed product descriptions and information about our company.
- To purchase one of our high quality products please contact us directly or one of our many distributors.

ALL UNITS ARE IN COMPLIANCE WITH THE RELEVANT INTERNATIONAL LEGISLATION. ALL MODELS COME WITH A 3-YEAR GUARANTEE (EXCLUDING CONSUMABLES).

Professional Sticky Traps

Find us on:  Facebook

Our Professional Sticky Traps are high quality units combining advanced glue board technology with slim-line designs.

They catch insects securely allowing units to be placed closer to sensitive areas. They do not have an electric killing grid making them silent, discreet and hygienic whilst catching all sizes of insects including smaller species such as Fruit Flies.

Their consumables can easily and quickly be accessed without the need for a tool.

Chameleon® 1x2

Attractive, slim, wall-mounted (free standing bracket available), compact and unobtrusive, this unit is ideal for use in food preparation areas.

Chameleon® 1x2 units are ultra-slim, easy to maintain, compact and unobtrusive and only require a periodical change of glue boards and an annual tube replacement to maintain optimum performance.

With the Chameleon® 1x2, insects are caught cleanly and safely onto the glue board. No noise, no smell, no problem. This allows the equipment to be placed closer to sensitive areas.

Chameleon® units from this range use interchangeable tubes and sticky boards to minimise stocking requirements.

Find us on:  Facebook

Chameleon® 1x2 DISCRETION

Discreet and slim wall-mounted unit.

An attractive front cover conceals the sticky board and catch, which makes this unit ideal for areas in view of the public.

This Chameleon® 1x2 Discretion offers very similar features as the standard 1x2, but with added discretion.

(free-standing bracket available).

Professional Sticky Traps

Find us on:  Facebook

Chameleon® 2x2

Designed to be ceiling-suspended, this model provides double sided attraction and is ideal for industrial and commercial food premises.

Populations of smaller flies are on the increase, putting jobs and reputations on the line. The double sided Chameleon® 2x2 protects large open areas and catches all sizes of flies, especially the smaller ones that may be missed by traditional fly units.

Chameleon® units from this range use interchangeable tubes and sticky boards to minimise stocking requirements.

Chameleon® VEGA

The Chameleon® Vega is powerful, stylish and economical.

Its elegant and ultra-slim design, based on revolutionary new technology, combined with an all stainless steel or white all metal construction will suit most environments.

It features new higher energy efficient UVA tubes with Reflectobakt® technology powered by a state of the art electronic ballast to deliver efficient fly control with low running costs. The slimness and style of the Chameleon® Vega is achieved thanks to the latest generation of UVA tubes, which offers improved UVA performance as well as a reduction in glass content.

Professional Electronic Fly Killers

Find us on:  Facebook

The Electronic Fly Killers use powerful tubes to attract flying insects onto a high voltage killing grid to eradicate them. The insects subsequently fall into a catch-tray.

They are designed with both the professional technician and the end-user in mind.

They combine robust and powerful designs with a choice of either wall-mounted, ceiling-suspended or freestanding installations.

Professional Electronic Fly Killers

The specialist range provides special safety features such as high IP ratings and flameproof electrical enclosures giving you protection against the most hazardous and potentially dangerous areas.

The units are built to the highest possible specifications and accredited to the ultimate safety certification for electrical equipment.

This means that sensitive and often highly dangerous areas (ATEX classified zones) can be protected without compromising safety standards or insurance requirements.

Chameleon® 1x2IP

The Chameleon® 1x2IP unit offers advanced fly control for demanding environments and is suitable for areas that are steam-cleaned, hosed down and are damp or corrosive e.g. dairies, abattoirs and industrial kitchens.

It is entirely made in stainless steel and is protected from high pressure water jets from any direction.

Nemesis[®] QUATTRO IP

The Nemesis Quattro IP24 is an all stainless steel industrial model, which can withstand exposure to high humidity, water splashes and corrosive atmospheres.

It is both powerful and energy efficient, featuring new high efficiency UVA tubes powered by a state of the art electronic ballast for optimum fly control performance with low running costs and reduced materials (glass and mercury notably). It is equipped with 'power-on' and high voltage LED indicators, the killing grid is extractable and the front guard can be locked in open position, which all contribute to the overall ease of servicing.

Chameleon® EXG

This custom-designed unit has been exclusively engineered to allow protection in areas where gas and vapour are present such as: distilleries and in the petrochemical and pharmaceutical industries.

The Chameleon® EXG is made to comply with exacting ATEX standards (ATEX Directives 99/92/EC and 94/9/EC) and is made from the highest quality materials to give a fully corrosion-resistant construction using 304-brushed stainless steel and Marine-grade aluminium alloy. It is suitable for use in zones 2 and 1 - atmospheres where flammable gases/vapours are likely to arise and zones 22 and 21 - atmospheres where combustible dust/powder may be present.

UV fly killers

- To maintain maximum effectiveness, tubes should be changed at least every 12 months, preferably at the onset of warmer weather.
- Quantum® tubes are recommended, as their effective lifespan is longer than most other tubes, which reduces the amount of maintenance required.
- Use a UV-A Meter to measure the ultra-violet output of tubes, to give you an instant indication of tube effectiveness and their remaining life.
- If the unit requires starters, replace them at the same time that you change the tubes.

Additionally for UV sticky traps

- Use Reflectobakt® sleeves to maintain optimum fly control performance particularly when the glue board and the tubes are placed close together.
- Replace the sticky boards every 2 months to ensure maximum efficacy.

Additionally for Electronic Fly Killers (EFKs)

- Use a grid tester to test the killing grid without shorting the high tension current onto the metal body of the machine, as often happens when using a conventional screwdriver (unless the unit has a high voltage 'grid-on' indicator like the Nemesis Quattro line).
- Brush down the killing grid (only when it is turned off!) to remove insect fragments.
- Empty the catch tray frequently.
