# About Us

Find us on:  Facebook

Supporting you with a comprehensive range of professional UV fly control units.

Innovation, quality and power are key components in all our units. Combining excellent value with expertise from technicians and leading biologists, we offer a diverse range of professional and specialist Electric Fly Killers.

We are passionate about flying insect control, guaranteeing that you receive the very best units built to the highest specification.

## Quality Products

Our high-quality insect control products are the preferred choice for many of the world's best 5-star resorts and hotels, franchised food outlets, hospitals, commercial and domestic kitchens, government and public parks and international airports.

- We strive to continue our research and development, manufacturing new and improved products and delivering tangible benefits to public health, the environment and the community through the control of pests, diseases and infection.
- Providing the most cost-effective and eco friendly pest control solutions on the market.
- All products come with a 3-year limited warranty
- We conform to all Australian and International safety standards.

## Quality Management

We pride ourselves on our quality service and efficient management.

- We have a dedicated management, sales and production team servicing many valued distributors and customers throughout the world.
- Our management ethos is simple: uncompromising first-class service, quality products, quality design; always available, 7 days a week.

**Chameleon® EXG**

This custom-designed unit has been exclusively engineered to allow protection in areas where gas and vapour are present such as: distilleries and in the petrochemical and pharmaceutical industries.

Fitted with two Quantum X shatterproof tubes and the dedicated LED range glue board, the Chameleon® EXG X is made to comply with exacting ATEX standards (ATEX Directives 99/92/EC and 94/9/ EC) and is made from the highest quality materials to give a fully corrosion-resistant construction using 304-brushed stainless steel and Marine-grade aluminium alloy.

It is suitable for use in zones 2 and 1 - atmospheres where flammable gases/vapours are likely to arise and zones 22 and 21 - atmospheres where combustible dust/powder may be present.

## DIMENSIONS

# Professional Sticky Traps

Find us on:  Facebook

**Our Professional Sticky Traps are high quality units combining advanced glue board technology with slim-line designs.**

They catch insects securely allowing units to be placed closer to sensitive areas. They do not have an electric killing grid making them silent, discreet and hygienic whilst catching all sizes of insects including smaller species such as Fruit Flies.

Their consumables can easily and quickly be accessed without the need for a tool.

# Professional Sticky Traps

Find us on:  Facebook

## Chameleon® 1x2

Attractive, slim, wall-mounted (free standing bracket available), compact and unobtrusive, this unit is ideal for use in food preparation areas.

Chameleon® 1x2 units are ultra-slim, easy to maintain, compact and unobtrusive and only require a periodical change of glue boards and an annual tube replacement to maintain optimum performance.

With the Chameleon® 1x2, insects are caught cleanly and safely onto the glue board. No noise, no smell, no problem. This allows the equipment to be placed closer to sensitive areas.

Chameleon® units from this range use interchangeable tubes and sticky boards to minimise stocking requirements.

### DIMENSIONS

H: 31.5cm W: 48.5cm D: 6.5cm

## Chameleon® VEGA

The Chameleon® Vega is powerful, stylish and economical.

Its elegant and ultra-slim design, based on revolutionary new technology, combined with an all stainless steel or white all metal construction will suit most environments.

It features new higher energy efficient UVA tubes with Reflectobakt® technology powered by a state of the art electronic ballast to deliver efficient fly control with low running costs. The slimness and style of the Chameleon® Vega is achieved thanks to the latest generation of UVA tubes, which offers improved UVA performance as well as a reduction in glass content.

**Fly Control**

Find us on:  Facebook

**The specialist range provides special safety features such as high IP ratings and flameproof electrical enclosures giving you protection against the most hazardous and potentially dangerous areas.**

The units are built to the highest possible specifications and accredited to the ultimate safety certification for electrical equipment.

This means that sensitive and often highly dangerous areas (ATEX classified zones) can be protected without compromising safety standards or insurance requirements.

## Nemesis® QUATTRO IP

The Nemesis Quattro IP24 is an all stainless steel industrial model, which can withstand exposure to high humidity, water splashes and corrosive atmospheres.

It is both powerful and energy efficient, featuring new high efficiency UVA tubes powered by a state of the art electronic ballast for optimum fly control performance with low running costs and reduced materials (glass and mercury notably). It is equipped with 'power-on' and high voltage LED indicators, the killing grid is extractable and the front guard can be locked in open position, which all contribute to the overall ease of servicing.

## Chameleon® 4x4

The Chameleon® 4x4 is a powerful sticky trap, particularly suited for industrial food premises.

An advanced electronic ballast circuitry reduces the running costs and increases efficiency.

## Chameleon® 4x4EX

The Chameleon® 4x4 EX is an ATEX compliant all stainless steel industrial UV fly trap.

It is suitable for use in potentially explosive atmospheres in ATEX zone 22 classified areas. Its IP65 rating also allows installation in damp, dusty or corrosive environments. This powerful unit covers large industrial areas trapping even the smallest insects on its double-sided board.

### DIMENSIONS

H: 61.5cm W: 63.5cm D: 16.5cm

### WEIGHT

4x4: 11.75kg / 4x4EX: 15.5kg

### COVERAGE

Ceiling suspended: 440m<sup>2</sup>

### FINISH

4x4 White  4x4EX Stainless steel

### TUBE DATA

- 4 x 40-Watt PestWest Quantum® tubes
- Shatterproof coating with industry compliant FEP
- Reflectobakt® technology
- Powered by an electronic ballast
- IP Rating - Chameleon® 4X4EX: IP65

flyDetect® from PestWest®, the industry leader in online flying insect monitoring.

- 24/7 remote monitoring system.
- Immediate notification of emerging pest infestations.
- Customisable alert levels.
- Built-in high resolution camera captures the entire sticky board.
- Set up and monitor multiple clients.
- Temperature and humidity are recorded alongside each image.
- Scheduled UV-A tube and sticky board change notifications.
- Multiple connectivity options (Wifi, Ethernet and Cellular).
- The flyDetect® app is available on multiple platforms (smartphones and computers).

**DIMENSIONS**

H: 22cm W: 69cm D: 24.5cm

**WEIGHT**

4.5kg

**COVERAGE**

Wall mounted: 70m<sup>2</sup>

**FINISH**

**TUBE DATA**

- 2 x 15-Watt PestWest Quantum® tubes
- Shatterproof coating with industry compliant FEP

# Flying insect control meets remote monitoring

flyDetect<sup>®</sup> is a unique remote monitoring system with a built-in camera linked to a dedicated online web & mobile app.

Now you can view all your flyDetect<sup>®</sup> traps without even being on site!

The wide-angle camera on the trap captures images of the entire sticky board, delivering full assessments in real time to wherever you are.

The permanent 24/7 monitoring system is constantly working for you, alerting you only when necessary.

**flyDetect<sup>®</sup> designed to save you time and money!**

## UV fly killers

- To maintain maximum effectiveness, tubes should be changed at least every 12 months, preferably at the onset of warmer weather.
- Quantum® tubes are recommended, as their effective lifespan is longer than most other tubes, which reduces the amount of maintenance required.
- Use a UV-A Meter to measure the ultra-violet output of tubes, to give you an instant indication of tube effectiveness and their remaining life.
- If the unit requires starters, replace them at the same time that you change the tubes.

## Additionally for UV sticky traps

- Use Reflectobakt® sleeves to maintain optimum fly control performance particularly when the glue board and the tubes are placed close together.
- Replace the sticky boards every 2 months to ensure maximum efficacy.

## Additionally for Electronic Fly Killers (EFKs)

- Use a grid tester to test the killing grid without shorting the high tension current onto the metal body of the machine, as often happens when using a conventional screwdriver (unless the unit has a high voltage 'grid-on' indicator like the Nemesis Quattro line).
- Brush down the killing grid (only when it is turned off!) to remove insect fragments.
- Empty the catch tray frequently.
