QBL LED

Retrofit Technology

Upgrade PestWest® fly control units & embrace UVA led technology!

Why throw away recent purchases when you can upgrade?

Our leading Chameleon® traps with fluorescent tubes can be transformed into LED units to provide significant savings in electricity, lower the environmental impact and improve the management of energy usage.

Engineered to work effectively with the Chameleon® 1x2, 2x2 and Uplight models.

The transformation is simple:

A straightforward switch of the fluorescent tubes, the starters and the glue boards, with PestWest QBL LED retrofit tubes, LED starters and LED optimised glue boards.

The upgraded unit will offer all the main advantages of LED technology.

- Mercury free
- Environmentally sustainable
- 3-year tube lifespan
- Low power consumption

Comparison of power consumption in Watts

* Calculated with an average cost of electricity of 28p per kWh and 10 units per site.

About Us

Find us on:

Welcome to PestWest Australia – Your Trusted Partner in Flying Insect Control Solutions!

Who We Are

At PestWest Australia, we understand the challenges that flying insects pose to homes, businesses, and communities.

That's why we are dedicated to providing cutting-edge, effective, and environmentally responsible pest control solutions. With over 50 years of experience in the industry, we have emerged as a leading authority in pest management across the globe.

Our Mission

Our mission is simple but powerful: To safeguard homes, businesses, and the environment from the threats posed by flying insects.

We strive to achieve this by delivering innovative, science-based solutions that are not only effective but also sustainable.

What Sets Us Apart

Expertise

Our team consists of highly trained and skilled professionals who are passionate about pest control.

We stay ahead of the curve by continuously updating our knowledge and techniques to ensure we provide the best solutions and service for all our customers.

Comprehensive Solutions

Whether you're dealing with the common house fly or facing more complex challenges in a commercial setting, PestWest Australia has a solution for you.

We offer a comprehensive range of high-quality UV insect light traps tailored to your specific needs.

Eco-Friendly Practices

We prioritize the health and well-being of our customers, their families, and the environment.

Our commitment to sustainability is reflected in our use of eco-friendly products and practices that minimize the impact on the ecosystem while effectively controlling pests.

Customer-Centric Approach

Customer satisfaction is at the core of our business. We work closely with our clients to understand their specific concerns and develop flying insect solutions to suit their requirements.

Our responsive and friendly team is always ready to address your questions and provide ongoing support.

Quantum X LED Units

Find us on:

PestWest Starkeys' latest development offers even more environmentally responsible models.

All of these units incorporate the new Quantum® X LED tubes and are on the cutting edge of energy efficient lighting technology. The innovative designs allow for highly efficient, yet discreet, models which allows us to take fly control to a whole new level.

Quantum X LED Units

Find us on:

Chameleon® QUALIS

The revolutionary UV LED fly control unit the market has been waiting for!

- Lowest power consumption, consistent with superior flying insect attraction
- A bliss to service - LED tubes require replacement only once every 3 years
- PestWest® LED sticky board with specially formulated adhesive
- Full metal construction

DIMENSIONS

Quantum X LED Units

Find us on:

Chameleon[®] EXG

This custom-designed unit has been exclusively engineered to allow protection in areas where gas and vapour are present such as: distilleries and in the petrochemical and pharmaceutical industries.

Fitted with two Quantum X shatterproof tubes and the dedicated LED range glue board, the Chameleon[®] EXG X is made to comply with exacting ATEX standards (ATEX Directives 99/92/EC and 94/9/ EC) and is made from the highest quality materials to give a fully corrosion-resistant construction using 304-brushed stainless steel and Marine-grade aluminium alloy.

It is suitable for use in zones 2 and 1 - atmospheres where flammable gases/vapours are likely to arise and zones 22 and 21 - atmospheres where combustible dust/powder may be present.

SIRIUS

MADE IN UK

The Chameleon® Sirius X is the next generation fly control unit for sophisticated front-of-house use. Sticking to the clean and futuristic design of the Chameleon® Sirius, it will continue to blend in seamlessly into any restaurant, café or hotel.

Fitted with two Quantum X shatterproof tubes and the dedicated LED range glue board, the appealing unit helps to save energy and contributes to the wider mission of sustainability. Additionally, each centrally dividable replacement glue board gives two usages.

The Sirius X offers dual wall mounting options, either horizontally or vertically.

ON-TOP **PRO**

ON-TOP **PRO2**

Innovative and discreet, the unique overhead design fits easily into new or existing suspended ceilings.

This discreet and stylish LED system is designed to be suspended ceiling installed. This patented concept offers an ideal solution for supermarkets, convenience stores, fast-food restaurants, and many others. The perfect solution to limited or no wall space.

The bodywork is a conformal zintec steel (rust-resistant) chassis. An exclusive polished aluminum reflector optimizes flying insect capture through LED UVA light specular reflection. The cover is brushed stainless steel.

The ON-TOP PRO2 X features a curved stainless steel front which holds the Quantum® X LED system glue board. The front easily pivots for convenient service and maintenance.

Find us on:

Chameleon® STELLARIS X

A unique double-sided LED UV fly control unit for large, open industrial areas.

The patent pending design maximises the 360° UV output of the Quantum® X LED technology to increase energy savings and reduce consumables with no compromise on fly control performance. The Chameleon Stellaris consumes 6 times less than its equivalent Chameleon model with fluorescent tubes and 3 times less than most other LED suspended models with a similar coverage area. Its full metal construction further reduces the environmental impact.

The servicing is fast and easy with direct access to consumables, notably the lateral insertion and withdrawal of the LED optimised glue boards.

QBL Retrofit LED Units

Find us on:

Introducing the QBL Retrofit LED range by PestWest – units upgraded with cutting-edge LED technology!

With these units, you gain the advantages of LED technology, including a lifespan of 3 years, power efficiency, and cost savings. LEDs are environmentally friendly as they consume less energy, contain no toxic materials like mercury found in fluorescent lights, and are recyclable. Overall, LED units represent a modern and sustainable lighting choice that offers economic, environmental, and operational advantages for various applications.

Good to know: With QBL Retrofit LED tubes, you have the flexibility to transform all your 15-watt fluorescent units to LED units.

QBL Retrofit LED Units

Professional Sticky Traps

Find us on:

Our Professional Sticky Traps are high quality units combining advanced glue board technology with slim-line designs.

They catch insects securely allowing units to be placed closer to sensitive areas. They do not have an electric killing grid making them silent, discreet and hygienic whilst catching all sizes of insects including smaller species such as Fruit Flies. Their consumables can easily and quickly be accessed without the need for a tool.

Chameleon® 1x2

Attractive, slim, wall-mounted (free standing bracket available), compact and unobtrusive, this unit is ideal for use in food preparation areas.

Chameleon® 1x2 units are ultra-slim, easy to maintain, compact and unobtrusive and only require a periodical change of glue boards and an annual tube replacement to maintain optimum performance.

With the Chameleon® 1x2, insects are caught cleanly and safely onto the glue board. No noise, no smell, no problem. This allows the equipment to be placed closer to sensitive areas.

Chameleon® units from this range use interchangeable tubes and sticky boards to minimise stocking requirements.

DIMENSIONS

H: 30cm W: 47.5cm D: 6.5cm

Specialist Range

Find us on:   

The specialist range provides special safety features such as high IP ratings and flameproof electrical enclosures giving you protection against the most hazardous and potentially dangerous areas.

The units are built to the highest possible specifications and accredited to the ultimate safety certification for electrical equipment.

This means that sensitive and often highly dangerous areas (ATEX classified zones) can be protected without compromising safety standards or insurance requirements.

Find us on:

Nemesis[®] QUATTRO IP

The Nemesis Quattro IP24 is an all stainless steel industrial model, which can withstand exposure to high humidity, water splashes and corrosive atmospheres.

It is both powerful and energy efficient, featuring new high efficiency UVA tubes powered by a state of the art electronic ballast for optimum fly control performance with low running costs and reduced materials (glass and mercury notably). It is equipped with 'power-on' and high voltage LED indicators, the killing grid is extractable and the front guard can be locked in open position, which all contribute to the overall ease of servicing.

or send us an Email**

UV fly killers

- To maintain maximum effectiveness, tubes should be changed at least every 12 months, preferably at the onset of warmer weather.
- Quantum® tubes are recommended, as their effective lifespan is longer than most other tubes, which reduces the amount of maintenance required.
- Use a UV-A Meter to measure the ultra-violet output of tubes, to give you an instant indication of tube effectiveness and their remaining life.
- If the unit requires starters, replace them at the same time that you change the tubes.

Additionally for UV sticky traps

- Use Reflectobakt® sleeves to maintain optimum fly control performance particularly when the glue board and the tubes are placed close together.
- Replace the sticky boards every 2 months to ensure maximum efficacy.

Additionally for Electronic Fly Killers (EFKs)

- Use a grid tester to test the killing grid without shorting the high tension current onto the metal body of the machine, as often happens when using a conventional screwdriver (unless the unit has a high voltage 'grid-on' indicator like the Nemesis Quattro line).
- Brush down the killing grid (only when it is turned off!) to remove insect fragments.
- Empty the catch tray frequently.

Chameleon® Qualis LED		Page 07
	Dimensions	H: 30cm W: 57.5cm D: 4cm
